GOK and HybridSupply launch strategic sales partnership for Mopeka in Europe

The cooperation expands access to digital technologies for fill level measurement in the DACH region and throughout Europe.

Lübeck / Marktbreit, 01.12.2025 – GOK Regler- und Armaturen-Gesellschaft mbH & Co. KG and HybridSupply GmbH have announced a strategic partnership for the joint marketing of Mopeka products in Europe. The collaboration aims to make the highly precise sensor and monitoring solutions from Mopeka Products LLC more widely available across Europe, thereby taking digital fill level measurement for liquid and gas tanks to a new level.

As part of the cooperation, HybridSupply assumes the role of exclusive distributor responsible for the Europe-wide supply of specialist retailers and additional sales partners with Mopeka products. GOK is responsible for the exclusive sales activities in the field of fuel oil and stationary LPG supply in the DACH region and is integrating the complete Mopeka product range into its existing sales structures.

“With Mopeka, our customers receive a very precise and highly versatile technology for digital fill level measurement – a genuine enhancement for operational processes, service quality and supply security,” says Jan-Philipp Dürr, Head of Sales, GOK. “HybridSupply is the ideal partner for us because the company has been deeply rooted in the European LPG market for many years and has extensive experience in distributing technologically sophisticated products.”

Mopeka technology is based on high-resolution ultrasonic and sonar sensors that reliably detect the fill levels of liquids and gases – regardless of the shape or size of the tank. The measured values can be monitored via app, cloud or open interfaces and integrated into

existing systems. This makes the solutions attractive for energy suppliers and commercial operations as well as demanding end users.

“Through our cooperation with GOK, we are combining modern sensor technology with decades of expertise in tank and control technology,” adds Kevin Sean Baumanns, Export Director, HybridSupply GmbH. “This creates real added value for the market: innovative products, reliable consultation and technical support from a single source.”

With this new partnership, GOK and HybridSupply are strengthening the availability of forward-looking fill level measurement solutions in Europe and creating the foundation for further joint developments in the field of digital content monitoring.

GOK

GOK Regler- und Armaturen-Gesellschaft mbH & Co. KG is one of the leading manufacturers when it comes to regulator and fittings technology for LPG and fuel oil. The range of products and services offered by the medium-sized company extends far beyond just regulators and fittings, however. GOK also offers a full range of components, solutions and systems for each of the areas of LPG systems, LPG for leisure time use, oil firing installations and tank management. The company also supports its customers with specialist services and the provision of know-how. Established in Ochsenfurt, Germany in the year 1968, the family-owned company is now based in Marktbreit near Würzburg in Lower Franconia and is managed by Dieter Kleine, Andreas Brohm and Manuel Stöcker.
