Caramatic TwoControl – Remote display and regulator heating

What is Caramatic TwoControl?

The TwoControl is an information and control unit which is used in caravans and motor caravans. Campers can thus monitor both the operating cylinder and the reserve cylinder in the gas system, as well as the de-icer regulator heating.

Where can I use the Caramatic TwoControl?

The system is suitable for gas pressure regulation systems, pressure regulators and changeover valves of the Caramatic line:

- DriveTwo / ProTwo / SwitchTwo

The Caramatic TwoControl is also compatible with the following silver gas pressure regulation systems from Truma:

- DuoControl CS / DuoComfort

What are the benefits?

- Convenient gas system monitoring at a glance – with no need to open the gas locker
- Always know which gas cylinder gas is being taken from
- Control the regulator heating at the push of a button
- Display the operating status of the regulator heating

Shop packaging

Caramatic TwoControl – Remote display and regulator heating

Information and control unit with transmitter for remote display and de-icer regulator heating 71 300 00
